

Cancer Hypnosis

Powerful, positive hypnotic suggestions to promote healthy cells

Everyone deserves to live a happy and healthy life.

Hypnosis, positive suggestion, NLP and timeline therapy can be used together to change fearful, sad, angry or unhelpful thoughts quickly.

Hypnosis is a normal, natural and relaxed state of consciousness that we all drift in and out of, for example when watching television, getting lost in a book, a piece of music, or a day dream, or just before we go to sleep.

Life isn't always fair, but for now maybe it is time to put your energies into getting well, you can do this can't you...

This recording is intended to help you gain control and balance as you work together with your conscious and unconscious mind to optimum health and wellbeing...

I believe state of mind has a bearing on success and results.

You may choose to listen as often as you wish to all or part of the recording. Your mind is very powerful and listening often may help the healing process.

There is no right or wrong, there just is.

Please contact me with any questions, or just to chat

T: 01253 380420 E: info@johannalucketti.co.uk

In my experience the more I practice the more benefit I receive and the more relaxed I become.

I wish you the very best.

Kind Regards,

Johanna xx
